Coding to end Code

Sprint 3 report

Team Members: Rory Landau, Thomas Applewhite, Will Johnson, Max Nibler

Actions to stop doing:
- N/A. This is the final sprint

Actions to start doing:
- N/A. This is the final sprint

Actions to keep doing:
- N/A. This is the final sprint

Work completed/not completed:
- We completed the user stories for the:
    - Scrollbar
    - drag and drop
    - adding different blocks
    - code cleanup
    - UI design
    - Text input
- We did not complete User stories for:
    - User tooltips
    - User wiki
    These were marked as low priority coming into the sprint

Work Completion rate:

The previous sprint lasted 7 days. We completed 6 user stories. These user stories had a total of 48 estimated total work hours, but many unaccounted for tasks cropped up over the course of the sprint that were not included. The average user stories per day was 1. The average ideal work hours per day was around 6.5.
Below is the burndown chart from the sprint:
